EXPERIENCE

Software Engineer - Virtual Relationship Manager

Aug 2025 – Present

Commonwealth Bank of Australia

Sydney, NSW

- Enabling scale of Agentic AI applications through custom real time monitoring and analytics solutions tailored for compliance and groundedness
- Developed and deployed a full-stack analytics platform using NextJS and FastAPI onto AWS to enable scale with real-time AI agent monitoring, metrics, and facilitate human-in-the-loop supervision
- Designed a real-time data pipeline leveraging Apache Kafka to capture database changes and stream them to AI evaluation systems

Technologies Used: Python, Typescript, NextJS, AWS, Kafka, Semantic Kernel, LangGraph

Graduate Software Engineer

Feb 2024 – Aug 2025

Commonwealth Bank of Australia

Sydney, NSW

- Rotated across 3 teams, Credit Cards Modernisation, Engineering Tooling, and Virtual Relationship Manager.
- Built Agentic AI solutions using Semantic Kernel to enhance relationship management offerings for 800,000 small business banking customers
- Enhanced the SDLC Hub, an internal deployment management ecosystem with APIs to automate compliance document gathering, increasing Hub API traffic by 35%
- Modernised the credit card application flow with React and C#, replacing a legacy technology stack to significantly reduce application fulfilment lead times

Technologies Used: Python, Typescript, C#, Java, React, AWS, Azure, Semantic Kernel, LangGraph

EDUCATION

University of New South Wales

Sydney, NSW

Bachelor of Science in Computer Science - Distinction (76.7 WAM)

Feb. 2020 – Nov 2023

PROJECTS

QuickLinks | github.com/aarongill745/quicklinks

- A VSCode extension to open browser tabs through the command palette. Designed specifically to improve my development workflows
- Utilises global and workspace contexts to allow personalisation of link across projects
- Published, and readily available on the VSCode marketplace

Technologies Used: HTML, CSS, JavaScript, VSCode API

Godot | github.com/aarongill745/godot

- A terminal based project management tool, written in Golang and inspired by Git
- Designed JSONL based data persistence with features such as tags, priorities, and history

Technologies Used: Golang, Cobra, JsonL

Portfolio website | github.com/aarongill745/portfolio

- A personal portfolio website with options for 2D and Neo-Brutalist themes, inspired by my nostalgia for the Nintendo Gameboy and DSLite

Technologies Used: NextJS, Typescript, TailwindCSS, Github Pages

TECHNICAL SKILLS

Languages: TypeScript, Python, C#, Java, C, SQL, HTML/CSS, Go, YAML

Frameworks: React, Next.js, Flask, FastAPI, Node.js

Databases: PostgreSQL, MySQL, DynamoDB, MongoDB, Redis

Developer Tools: Git, Docker, AWS, VS Code, Claude Code, Shell
