EXPERIENCE

Software Engineer - Virtual Relationship Manager

Aug 2025 – Present

Commonwealth Bank of Australia

Sydney, NSW

- Built a full stack, real time analytics and AI agent monitoring platform using React, Typescript, and Python
- Deployed and maintained containerised micro-services and server-less functions on AWS ECS, AuroraDB, and Lambda
- Designed a Kafka data pipeline providing near real-time compliance metrics and live monitoring of production AI agents
- Implemented authentication and authorisation via single sign-on (SSO) and OAuth2 integrations for customer data protection
- Mentored 5 graduates and interns across engineering and data science domains, building their experience turning technical requirements into business outcomes

Technologies Used: Python, Typescript, NextJS, AWS, Kafka, Node, Docker

Graduate Software Engineer

Feb 2024 – Aug 2025

Commonwealth Bank of Australia

Sydney, NSW

- Rotated across 3 domains, Credit Cards Modernisation, Engineering Tooling, and Virtual Relationship Manager.
- Built Agentic AI solutions using Semantic Kernel and FastAPI to enhance relationship management offerings for 800,000 small business banking customers
- Enhanced the SDLC Hub, an internal deployment management ecosystem with APIs and reusable CICD components to automate compliance document gathering, increasing Hub API traffic by 35%
- Modernised the credit card application flow with React and C#, replacing a legacy technology stack to significantly reduce application fulfilment lead times

Technologies Used: Python, Typescript, C#, Java, React, AWS, Azure, Node, Docker, Semantic Kernel

EDUCATION

University of New South Wales

Sydney, NSW

Bachelor of Science in Computer Science - with Distinction

PROJECTS

QuickLinks | github.com/aarongill745/quicklinks

- VSCode extension built with Typescript, HTML, and CSS that consolidates browser bookmarks into the editor
- Available on the VSCode marketplace

Technologies Used: HTML, CSS, Typescript, VSCode API

Godot | github.com/aarongill745/godo

- A git inspired, terminal based project management tool written in Go
- Designed JSONL based data persistence with tagging, priorities, and history

Technologies Used: Go

Portfolio website | github.com/aarongill745/portfolio

- A personal portfolio website leveraging server-sided rendering (SSR) with frontend design inspirations from the Nintendo Gameboy and DSLite, built with NextJS and deployed on Github Pages

Technologies Used: NextJS, Typescript, TailwindCSS, Github Actions

TECHNICAL SKILLS

Languages: TypeScript, Python, C#, Java, C, SQL, HTML/CSS, Go, YAML

Frameworks: React, NextJS, Flask, FastAPI, NodeJS

Databases: PostgreSQL, MySQL, DynamoDB, MongoDB, Redis

Developer Tools: Git, Docker, AWS, Claude Code, Shell
