EXPERIENCE

Software Engineer - Virtual Relationship Manager

Aug 2025 – Present

Commonwealth Bank of Australia

Sydney, NSW

- Enabling scale of Agentic AI application through near real time analysis and monitoring solutions.
- Built and deployed a full-stack NextJS application to display AI agent analytics, reporting data, and human in the loop monitoring capability with manual ejection.
- Designed real-time CDC pipeline using Kafka to stream database changes to AI-powered event processing systems
- Developed custom tools for AI agents to retrieve and enrich customer responses with real-time data from internal systems

Technologies Used: Python, Typescript, NextJS, AWS, Kafka, Semantic Kernel. LangGraph

Technology Graduate - Engineering

Feb 2024 – Aug 2025

Commonwealth Bank of Australia

Sydney, NSW

- Contributed towards 3 initiatives across 18 months, Credit Cards Modernisation, Engineering Tooling, and AI Acceleration
- Built Agentic AI solutions using Semantic Kernel to enhance relationship management offerings for 800,000 small business banking customers.
- Enhanced the SDLC Hub, an internal deployment management ecosystem with APIs to automate compliance document gathering, increasing Hub API traffic by 35%.
- Modernised the entire credit card application flow with React and Redux, implementing a completely redesigned UI and UX, reducing application lead times by 90%, from 10 minutes to 1

Technologies Used: Python, Typescript, C#, Java, React, AWS, Azure, Semantic Kernel. LangGraph

EDUCATION

University of New South Wales

Sydney, NSW

Bachelor Science in Computer Science - Distinction

Feb. 2020 – Nov 2023

PROJECTS

Godo | github.com/aarongill745/godo

- A terminal based project management tool, written in Golang
- Designed JSONL based data persistence with features such as tags, priorities, and history
- CLI interface developed using Cobra framework, with workspace experience inspired by Git

Technologies Used: Golang, Cobra, JsonL

Portfolio website | github.com/aarongill745/portfolio

- A personal portfolio website with options for 2D and Neo-Brutalist themes, inspired by my memories of Nintendo Gameboy and DS Lite
- Published and hosted on Github Pages
- 4 unique looks with 2 separate styles (2D and Neo-Brutalism) with light and dark modes

Technologies Used: NextJS, Typescript, Github Pages

TECHNICAL SKILLS

Languages: Typescript, Python, C#, Java, C, SQL, HTML/CSS

Frameworks: React, Node.js, NextJS, Flask, FastAPI, Postgres, NoSQL, MongoDB

Developer Tools: Git, Docker, AWS, VS Code, Claude Code, Shell
